

Richa Chauhan

UX/UI Designer

+64 22 397 1611 | richasain1989@gmail.com | Auckland, New Zealand

NZ Post-Study Open Work Visa | Open to Relocation

SUMMARY

UX/UI designer with 4+ years of experience designing high-profile, industry-leading desktop and mobile applications. Core strengths include user research, user interface design, user experience design, web and mobile app design, and prototyping, with a focus on creating solutions that are intuitive for users and easy for clients to maintain.

EXPERIENCE

UX/UI Designer Intern — Theia Limited, Auckland, New Zealand

February 2025 – May 2025

Designed the UX/UI for Infomate, a community-based web platform connecting local users through services, events, marketplace, and real estate listings.

I designed the end-to-end UX/UI for the platform, creating wireframes, user flows, and high-fidelity prototypes in Figma. I led a UX audit and competitive analysis against comparable platforms to identify usability gaps, then partnered with the Director and General Manager to design and plan a new monetisation feature built around tiered promotional listings. I also created detailed design documentation, including style guides, component specs, and layout guidelines, to improve consistency between design and development.

Achievement: Invited to extend collaboration on the project for three additional weeks beyond the formal internship period, in recognition of the quality of work delivered.

UX/UI Designer — Scriptbees IT Pvt. Ltd., Hyderabad, India

May 2019 – July 2023

- Designed user-centric, intuitive interfaces across four major projects, improving the overall user experience and client satisfaction.
- Used Adobe XD and Figma for high-fidelity prototyping, consistently recognised for precision, creativity, and attention to detail.
- Mapped user journeys and user flows, and conducted research to inform design decisions and improve product functionality.
- Partnered closely with cross-functional teams to communicate design concepts and align work with broader strategic objectives.

Project: Sphara Mobile App

Duration: 3 months

Sphara is an emergency alert app designed to deliver timely notifications during critical situations. I led competitive analysis to understand existing solutions on the market, mapped out user flows to keep the experience seamless under stressful conditions, and designed intuitive interface mockups that helped users act quickly and confidently when it mattered most.

Project: Tax Filing Platform

Duration: 2 months

Tax Filing Platform was a tax compliance solution built from scratch for a Big 4 consulting firm, simplifying tax preparation and reconciliation workflows through a structured, human-centred experience. I worked closely

with stakeholders to gather and translate their requirements into design solutions, presented mockup screens for review and approval at each stage, and focused throughout on creating an efficient, user-friendly experience for tax professionals managing complex compliance workflows.

Project: Audit Management Tool Redesign

Duration: 1 month

This was a redesign initiative focused on improving the experience and interface of an existing audit management tool. I walked current users through the redesigned flow and gathered their feedback, simplified and streamlined user flows to reduce complexity, and revamped the interface to bring it in line with modern design principles.

EDUCATION

Master of Information Technology

Auckland Institute of Studies, Auckland, New Zealand | May 2024 – December 2025

Bachelor of Computer Application

Panjab University, Punjab, India | March 2006 – April 2009

SKILLS

Core: User Research, User Experience Design, Wireframing & Prototyping, User Interface Design, Design Thinking, Communication & Presentation

Tools: Figma, Adobe XD

Technical Knowledge: Basic working knowledge of HTML, CSS, and foundational React concepts

CERTIFICATIONS

- AI for Designers — Interaction Design Foundation (IxDF) (In Progress)
- Data-Driven Design: Quantitative Research for UX — Interaction Design Foundation (IxDF)
